The laboratory is an exciting and demanding place to be a professional today. There are endless new initiatives that increase the challenges within the lab due to a shrinking workforce.

KMQLS can help your team accomplish the goals of your lab by dedicating resources to priority goals while minimizing the impact on day to day operations.

KMQLS offers services and support in:

- ✓ Process and procedure development
- ✓ Laboratory project management/ coordination
- ✓ Standardization of tests, processes and procedures
- ✓ New equipment planning/ implementation
- ✓ Laboratory documentation preparation
- ✓ Point of care testing implementation
- ✓ Quality management systems/ Accreditation preparation
- ✓ Environmental Scan / literature reviews – Evidence based reports
- ✓ Customized on site professional development

I can help reduce the items on your lab's "To Do" list. Please contact me to discuss your projects and priorities.
